Profile Summary

Aspiring Software Developer proficient in **Java, C, SQL, React.js, and Web Development**, with a strong foundation in **Data Structures, DBMS, OOP, and problem-solving**. Interested in building scalable applications and continuously learning modern technologies.

Skills

- **Languages:** Java, C, SQL
- **Web Technologies:** HTML5, CSS3, JavaScript, React.js, Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Tools & Technologies:** Git, GitHub, Socket.IO, REST APIs, JWT, OAuth, VS Code
- **Core Subjects:** Data Structures & Algorithms, DBMS, Operating System, Computer Networks, OOP

Internship

Magsys Infosolutions (Remote) — **Full Stack Developer Intern** **Feb 2025 – Jun 2025**

- Developed responsive web applications and worked on frontend implementation, backend integration, and database connectivity.
- Performed testing, debugging, and optimization while collaborating with developers to deliver user-friendly solutions.

Projects

Anvil Studio - Web Dev & Cloud Services Agency | Next.js + Three.js Visit Site

- Built **Anvil Studio**, a live agency site offering websites, game server hosting, VPS/cloud setup, bots and SEO on a fixed-price model.
- Designed and developed a fully responsive, **3D-animated landing page** using Next.js and Three.js with smooth scroll interactions.
- Built a multi-step order form routing submissions to email/WhatsApp instantly with a lightweight admin panel, plus services, portfolio-filter, process-timeline and FAQ sections — deployed live on Vercel.

Tech Stack: *Next.js, Three.js, Tailwind CSS*

StackPilot - Universal Deployment Platform | Node.js + Express Visit Site

- Built a deployment platform that scans ZIP files or GitHub repos and **automatically figures out the framework being used** — such as React, Next.js, or Django.
- Recommends and deploys the project to **Vercel, Netlify, or Render** automatically, so users don't have to configure anything manually.
- Added secure login and project handling using JWT and OAuth, plus real-time deployment logs.
- Handled everything from cloning the GitHub repo to detecting the build setup and pushing it live, using Node.js on the backend.

Tech Stack: *Node.js, Express.js, MongoDB, React*

AuroraKart - Digital Product E-Commerce Platform | React + Node.js Github

- Built a full-stack online store for selling digital products, using React, Node.js, and MongoDB.
- Added **Razorpay payments** so customers could pay and instantly get their digital product delivered by email.
- Set up secure login with JWT, password reset, and Google sign-in, along with reviews, coupons, and an admin dashboard to manage everything.
- Made the whole shopping experience — browsing, buying, and tracking orders — smooth and responsive across devices.

Tech Stack: *React, Node.js, MongoDB, Razorpay*

Education

JSS University **2025 – 2027**
Master of Computer Applications *Noida, Uttar Pradesh*
JECRC University **2022 – 2025**
Bachelor of Computer Applications *Jaipur, Rajasthan*
Mahapragya International School *Jaipur, Rajasthan*
12th — 2021 – 2022
10th — 2019 – 2020

Certification

Infosys Springboard Certification in Java
Deloitte Data Analytics Job Simulation (Forage) — Data Analysis, Forensic Technology **Nov 2025**

Achievements

JECRC University — Class Representative (CR) **2022 – 2025**

- Coordinated academic communication between faculty and 60 students and managed notes, study resources, and previous year papers.
- Assisted faculty with classroom coordination and attendance management.
